Treasure Hunt Game

This is a simple game in which the player has to solve a series of riddles to find the treasure. The game has a limited number of chances and a hint option to assist the player in solving the riddles.

How to Play

Sign in using mail and password

Run the treasurehunt.py file

A window will open containing the first clue.

Enter your answer in the entry field and click the submit button.

If the answer is correct, you will receive the next clue. If not, you will lose a chance.

You have a total of three chances to solve the riddles and find the treasure.

If you lose all three chances, the game will end.

If you successfully solve all the riddles, you will receive a message congratulating you on finding the treasure.

Clues and Answers

The game contains a set of pre-defined clues and answers. The clues are stored in a list, and the answers are stored in a corresponding list. If the player enters an answer that matches the answer in the list, they will receive the next clue.

"You look for the limit but you find it infinite" - universe

"I speak without a mouth and hear without ears. I have no body, but I come alive with wind. What am I?" - echo

"I am a paradox, a riddle wrapped in a mystery, yet I am always there for you to see. What am I?" - reflection

"I am not alive, but I can grow; I don't have lungs, but I need air; I don't have a mouth, but I need water to live. What am I?" - fire

"The end is the beginning and the beginning is the end" - infinite

Hints

If the player is stuck, they can click the "Get a hint" button to receive a hint. The hint will display the first letter of the answer.

Dependencies

This game uses the tkinter and messagebox modules, which are included in the standard Python library.
